PROFESSIONAL SUMMARY

Full-stack engineer and digital entrepreneur with 10+ years bridging complex software engineering and high-growth business strategy. Specializing in Laravel, PHP, Node.js, React Native, and TypeScript across scalable cloud architectures, I build digital assets that solve real-world problems — from secure telemedicine platforms enabling remote healthcare to automated, revenue-driving sales funnels. I bring the technical rigor of a senior engineer and the strategic mindset of a founder to every project.

TECHNICAL SKILLS

Languages & Frameworks: Laravel, PHP, React Native, Node.js, JavaScript, TypeScript, Expo, Tailwind CSS, Blade, MySQL, PostgreSQL

Real-Time & APIs: Echo, Livewire, WebSocket, WebRTC, Agora SDK, RESTful API Design

Cloud & DevOps: DigitalOcean, AWS, GitHub Actions, CI/CD Pipelines, Nginx, SSH Authentication

Payments & Integrations: Stripe, Paystack, Flutterwave, Monnify, Squad, Zainpay, OpenAI API, Gemini API, Meta Business API

Design & Media: Adobe After Effects, Adobe XD, Illustrator, Figma, UI/UX Concepts, Graphic Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer

April 2025 – Present

MiClynics Innovation | Nigeria

- Architected and developed a comprehensive telemedicine platform supporting real-time audio and video consultations using WebSockets and WebRTC.
- Engineered secure backend APIs, database schemas, and digital prescription workflows with Laravel and MySQL, paired with a React Native, TypeScript, and Tailwind CSS mobile front end.
- Built advanced management modules including doctor earnings analytics, dynamic laboratory investigation tracking, and appointment scheduling.
- Automated staging and production deployment pipelines with GitHub Actions, securing servers via SSH and Nginx reverse proxies on DigitalOcean.

Senior Software Engineer

January 2023 – October 2023

Valpulse Services | Abuja, FCT, Nigeria

- Managed complete deployment lifecycles for mobile applications, configuring Android manifest permissions and coordinating releases on the Google Play Console.
- Configured open testing tracks and ensured full adherence to app store compliance guidelines.
- Maintained cloud infrastructure and resolved complex routing and application logic issues.

Software Engineer

July 2022 – September 2023

Sells Rocket | Nigeria

- Developed scalable web solutions and contributed to core backend microservices.
- Collaborated on code refactoring and database optimization strategies that improved platform response times.

Full-Stack Developer, Digital Marketer & Consultant

January 2019 – Present

Freelance | Global

- Designed and built scalable e-learning and university marketing platforms — including Da Vinci Circle, Northpreneur Hub, and Madrasa Hausa — with custom video playback and multi-tenant API routing.
- Integrated multiple FinTech payment gateways (Paystack, Flutterwave, Monnify) with automated webhook handlers to process multi-currency transactions and affiliate payouts.

- Da Vinci Circle: architected a university marketing hub and e-learning platform with custom course modules and a full-stack AI coding curriculum built on React and Tailwind CSS.
- Madrasa Hausa: built and deployed a digital education platform with multi-tenant API routing and automated onboarding workflows.
- Northpreneur Hub: developed a scalable online learning environment with custom video playback and dynamic progress tracking.
- Served as Graphic Designer (2015–Present) and Social Media Manager (2020–2025), producing brand assets, video animations, and promotional funnels.

LEADERSHIP & COMMUNITY

Director of Information & Communication Technology (Lagos)

September 2022 – August 2024

Nigeria Association of Computing Students (NACOS National)

Director of Software, ATBU Chapter

December 2019 – December 2020

Nigeria Association of Computing Students (NACOS National) | *Bauchi, Nigeria*

- Spearheaded technology initiatives, managed organizational software infrastructure, and advocated for digital literacy programs across regional and national chapters.

Team Lead — Google Africa Developer Scholarship (Android)

March 2020 – December 2020

Andela | *Nigeria*

- Led an Android community project as part of the Google Africa Developer Scholarship, in collaboration with Andela and Pluralsight.

EDUCATION

Abubakar Tafawa Balewa University — Bachelor of Technology, Computer Science (2017 – 2024)

Bright Information Technology, Azare — Higher National Diploma, Web Development (Aug 2018 – Dec 2019)

Udacity — Artificial Intelligence (2020)

University of Colorado Boulder — Graphic Design Elements for Non-Designers Specialization (2020)

CERTIFICATIONS & AWARDS

Awards: Best Techie of the Year (awarded twice), Digital Architect, Digital Innovator

Certifications: Advanced Laravel, UX Design: 1 Overview, Fundamentals of Social Media Advertising, Digital Skills Training, Figma Essential Training: The Basics
